

# STEM-CELLBANKER®

# **Cryopreservation Medium**

- Serum-Free
- Chemically Defined
- GMP Manufactured
- FDA DMF registered

Cat#: 11922 (previously [11897]) Qty: 20ml Expiry Date: 3 years from manufacturing date (see label)

# **Cell-Freezing:**

For optimum results, cells for cryopreservation should be in log phase of growth. Similar or standard freezing protocols may be substituted.

- 1. Examine and make sure the cell culture is free of contamination, in healthy situation and proper confluency, etc.
- 2. Perform a cell count to determine the viability of cells
- 3. Gently pellet the cells by centrifugation (3 5 minutes at 1,000~2,000rpm, 4°C). Remove the supernatant by using an aspirator.
- 4. Gently suspend the cells with STEM-CELLBANKER<sup>®</sup> cryopreservation medium (1 ml for  $5 \times 10^5 5 \times 10^6$  cells).
- 5. Dispense the cell suspension in 1 ml aliquots to cryopreservation vials that have been labeled with the cell line name, cell concentration, passage date and other essential information.
- 6. Place the vials directly in a -80°C for storage. If necessary, transfer the frozen vials to a liquid nitrogen storage tank after the vials have been frozen for at least 24 hours.
- 7. Optimum protocol may change with the cell types.

IMPORTANT: Optimum protocol may change with the cell types.

#### Procedure for Use:

<sup>©</sup>AMSBIO / AMS Biotechnology (Europe) Ltd. AMSBIO is the global source of all the products listed here. All trademarks mentioned here are the property of their respective owners.

#### **Thawing:**

- Remove the frozen cell from storage and quickly thaw in a 37°C shaking water bath. 1.
- 2. Immediately dilute and gently mix each Iml of cells with 10ml of complete cell culture medium.
- 3. Gently pellet the cells by centrifugation (3-5 minutes at 1,000 2,000rpm, 4°C). Remove the supernatant by aspirator.
- 4. Gently suspend the cells with appropriate volume of complete cell culture medium and plate in a culture flask.
- 5. Continue the further culture procedures according to standard protocols.

## **Guarantee of Quality:**

- 1. Manufactured in compliance with JPN, EU, US, and PIC/S GMP guidelines
- Bacterial contamination free Product has been tested and confirmed to be free of bacteria, fungi and 2 mycoplasma.
- 3. Chemical Analysis: pH (7.0 to 8.5 at room temperature) Endotoxin (<5 EU/mL)
- Performance test Cell viability above 80% (JM404, SK-007) is guaranteed. 4

## Storage of STEM-CELLBANKER®:

- 1. STEM-CELLBANKER<sup>®</sup> should be stored at 4°C or below.
- 2. For long-term storage STEM-CELLBANKER<sup>®</sup> can be frozen. Repeated freezing and thawing may impair the quality of the product; it is recommended that STEM-CELLBANKER<sup>®</sup> is aliquoted before freezing.

#### **Disclaimer:**

STEM-CELLBANKER® GMP grade is not by itself a pharmaceutical. Therefore, no warranty, express or implied, is made as to the fitness and suitability of this product for any particular purpose and/or merchantability unless the use is intended for research.

#### **Product Range:**

Description	Pack Size
CELLBANKER <sup>®</sup> I – Serum Containing	20 ml
CELLBANKER <sup>®</sup> I – Serum Containing	4 x 20 ml
CELLBANKER <sup>®</sup> I – Serum Containing	100 ml
CELLBANKER <sup>®</sup> 2 – Serum Free	20 ml
CELLBANKER <sup>®</sup> 2 – Serum Free	4 x 20 ml
CELLBANKER <sup>®</sup> 2 – Serum Free	I 00 ml
STEM-CELLBANKER <sup>®</sup> - GMP	20 ml
STEM-CELLBANKER <sup>®</sup> - GMP	4 x 20 ml
STEM-CELLBANKER <sup>®</sup> - GMP	100 ml
STEM-CELLBANKER <sup>®</sup> - GMP - DMSO Free	20 ml
STEM-CELLBANKER <sup>®</sup> - GMP - DMSO Free	4 x 20 ml
STEM-CELLBANKER <sup>®</sup> - GMP - DMSO Free	100 ml
STEM-CELLBANKER <sup>®</sup> EX - GMP	100 ml
CELLOTION cell wash solution	100 ml
