

CATALOG # 370255-1 Package Size: 200ug (0.2 mg) / vial
370255-S Package Size: 50ug (0.05 mg) / vial
Anti-Heparan Sulfate (10E4 epitope)

Batch number **10E4060720**

DESCRIPTION:

Clone:	F58-10E4
Isotype:	Mouse IgM, κ-chain
Physical state:	Liquid
Buffer:	Phosphate buffered-saline (-) (PBS(-))
Stabilizer:	None
Preservative:	0.02% sodium azide
Purification:	Purified by tangential ultrafiltration
Concentration:	1.0 mg/ml (Immunoglobulin fractions)

Immunogen:	Liposome-incorporated membrane heparan sulfate proteoglycan (F58) from human fetal lung fibroblasts
------------	---

SPECIFICITY:

Recognition: The antibody reacts with an epitope present in many type of heparan sulfate. The epitope includes (an) *N*-sulfated glucosamine residue(s) that are critical for the reactivity of the antibody. The reactivity of the antibody with most heparan sulfates is nearly completely abolished after treatment of glycosaminoglycan with bacterial heparinase (*Heparinase III from Flavobacterium heparinum*; EC 4.2.2.8)

Comment: The antibody does not react with hyaluronan, chondroitin sulfate, dermatan sulfate, keratan sulfate or DNA.

RECOMMENDED APPLICATIONS: The exact dilution must be determined by the researcher.

Flow cytometric analysis: 1:100-200 (0.5-1 µg of this antibody will label about 10⁵ cells)
 Immunohistochemistry: 1:50-100
 ELISA: 1:100-1:500
 Western blotting: Available

STORAGE:

Store at 4°C until opened. Diluted material should be used within a week.
 Avoid repeated freezing and thawing.
