

SAMPLE CERTIFICATE OF ANALYSIS

LOT #: PL031616L

PRODUCT Human Recovered Plasma, Charcoal Dextran Stripped, 200ml
CATALOG # SER-PLE-CDS

LOT COMPOSITION:

- ▶ **Number of donor(s) in lot** 1
- ▶ **Gender of donor(s):** Male
- ▶ **Age (average):** 32
- ▶ **Ethnicity** African American
- ▶ **BMI (kg/m²)** 31.2
- ▶ **Diabetic** No
- ▶ **Anticoagulant** K2 EDTA
- ▶ **Blood Type:** A+

DESCRIPTION

Each sample is derived from a volunteer adult donor who has signed an IRB or FDA validated donor consent form that specifically lists both the intended uses for the donation for non-clinical research and confirms the procedures for processing the samples are Standard Operating Procedure (SOP) managed GLP protocols in compliance with all legal and ethical regulations.

Human plasma was collected in K2-EDTA from consented adult donors. Plasma was then Charcoal Dextran stripped and sterile filtered using a 0.2 µm sterile filter. The plasma is shipped frozen using dry ice. Store at -20°C or colder.

QUALITY CONTROL

Each lot is tested via PCR and found non-reactive to viral DNA from HIV and hepatitis B, viral RNA from Hepatitis C and RPR test for syphilis. However, no known test can offer complete assurance that these viruses are not present. Since we cannot test all pathogens, always treat the culture as a potentially infectious reagent. We recommend using the US Centers for Disease Control (CDC) Universal Precautions for prevention of blood-borne pathogens as a minimum guideline for standards of practice.

These results have been verified.
