3. Hazard Identification

Special indication of hazard

Product contains 0.05% Sodium Azide which is very toxic if swallowed. Contact with acids liberates very toxic gas. Very toxic to aquatic organisms, may cause long term adverse effects in the aquatic environment

4. First Aid Measures

Skin contact:

Wash off immediately with plenty of water. Remove contaminated clothing.

Eye contact

Flush thoroughly with plenty of water, also under the eyelids

Inhalation

Move to fresh air

Ingestion

Wash out mouth with water provided person is conscious.

5. Fire Fighting Measures

Extinguishing media

Dry chemical powder

Special risks

Sodium azide emits toxic fumes under fire conditions and reacts with heavy metals to form explosive compounds

Special protective equipment for firefighters

Wear self-contained breathing apparatus and protective suit

6. Accidental Release Measures

Personal precaution procedures

Use personal protective equipment

Methods for cleaning

Soak up with inert absorbent material and rinse with water

7. Handling and Storage

Handling

No special handling advice required

Storage

Keep well closed in properly labeled container at 2-8°C

8. Exposure Controls / Personal Protection

Engineering measures

Ensure adequate ventilation

Personal protective equipment

Respiratory protection: In case of insufficient ventilation wear suitable respiratory equipment

Hand protection: Compatible chemical resistant gloves

Eye protection: Safety goggles

Skin and Body protection: Lightweight protective clothing

Hygiene measures: Handle in accordance with good industrial hygiene and safety practice
